

HERSTORYMUSEUM

[Since 2017](#)[About](#)[Exhibitions](#)

HERSTORYMUSEUM is a fictional museum created by artist **María María Acha-Kutschner**, whose overarching objective is to bring a feminist perspective to its curatorial program. HERSTORYMUSEUM will encompass periodically online and public space exhibitions as feminist "guerilla" strategy, to create narratives that construct new histories and reinforce the presence of the female creators in culture in different contexts throughout history. A female presence interconnected between different disciplines and connected with political and social transformations. HERSTORYMUSEUM operates in a symbolic visual field, where a visual language was created specifically to construct the funds of this museum.
